

To clear the Java cache:

1. Click **Start > Control Panel**.
2. Double-click on the **Java** icon in the control panel.  
The **Java Control Panel** appears.

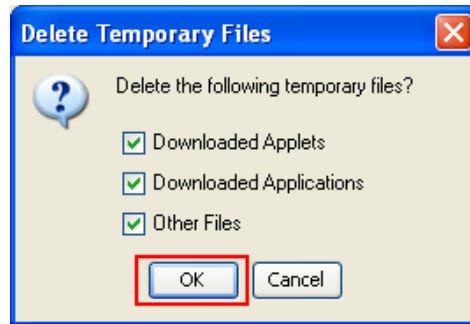

3. Click **Settings** under Temporary Internet Files.

The **Temporary Files Settings** dialog box appears.

4. Click **Delete Files**.

The **Delete Temporary Files** dialog box appears.

Select all the check boxes:

1. Delete Files
  2. View Applications
  3. View Applets
5. Click **OK** on **Delete Temporary Files** window.

## **You must then download the CFD and/or Spreads applications.**

For **Spreads** please click on the link below:

<http://www.gt247.com/webstart/app/clientApplicationLaunch.jnlp>

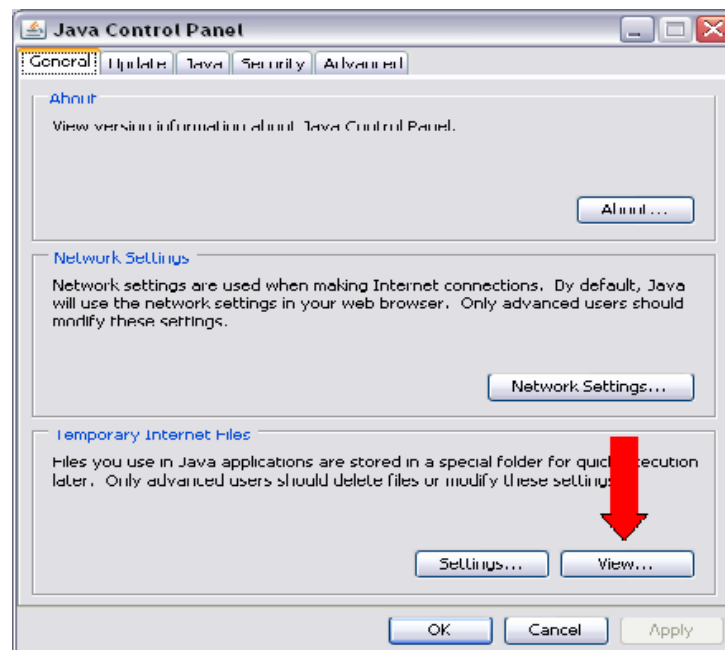

For **CFD's** please click on the link below:

<http://www.gt247.com/cfd.client.webstart/app/clientApplicationLaunch.jnlp>

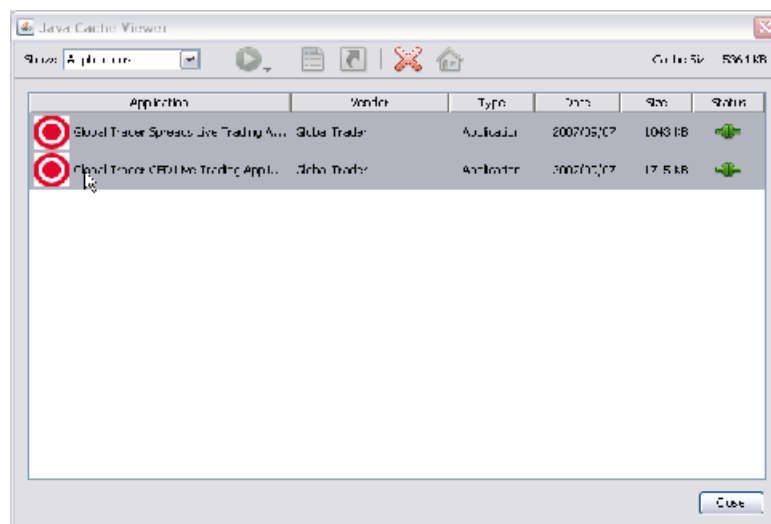

Please allow for the application to download and the login window will appear. Kindly now log into the application, to confirm that it has been installed correctly and is functional.

The application shortcut should now be removed from your desktop and will need to be recreated. Kindly follow the steps listed below:

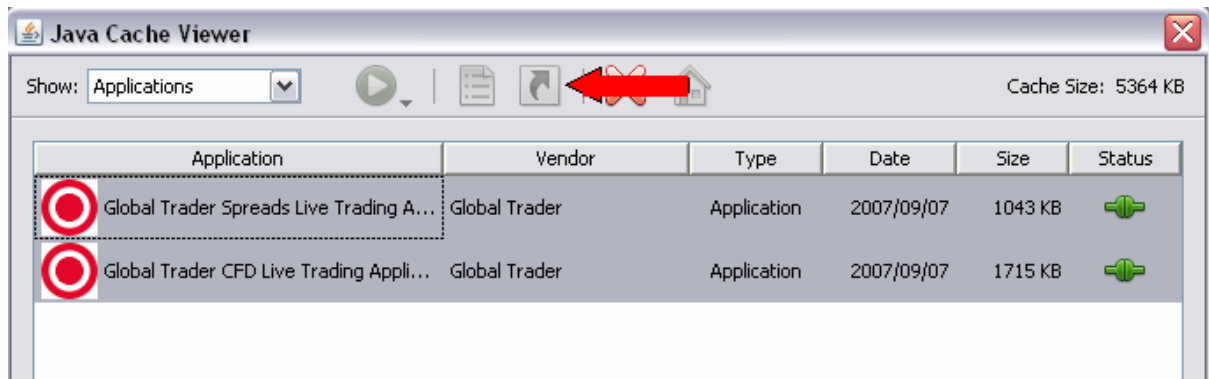

1. Click **Start > Control Panel**.
2. Double-click the **Java** icon in the control panel.  
The **Java Control Panel** appears.
3. Click on “View”

The **Java Cache Viewer** window appears

4. In this window you will find the **Global Trader Applications**. Select the application and/or applications by clicking on them (this will highlight them)
5. Thereafter click on the “Install Shortcut” icon

You should now see the Global Trader application icons appear on your desktop
